
THINK - TOUCH - CONTROL

EVOLUTION

Introducing Evolution

Evolution provides a complete home automation service for private clients, builders and developers.

Our clients are among the first in the country to take absolute control over their home environments... in-house cinema systems and multi room audio options... these are just some of the innovations on offer. With our integrated solutions, there's no limit to what you can achieve.

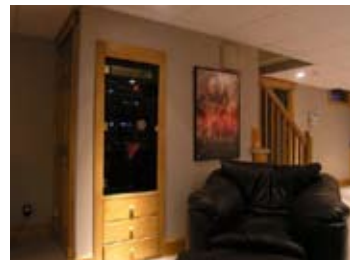

Utilising cutting edge technology, Evolution gives unprecedented levels of interaction with, and mastery over, in-house entertainment and security systems. Evolution works alongside clients, designers and architects to deliver complete (and individually tailored) home integration and home automation services.

Our products fall into these broad areas:

- Custom home cinema
- Smart home automation (including lighting control)
- HD video distribution
- Multi room digital audio
- Architectural lighting design
- CCTV systems

"Typically, our involvement begins at the planning stages. We liaise with you to assess your expectations. You've got carte blanche – we can achieve almost any configuration of entertainment and security systems – ours is a truly bespoke service."

Like the industry, we've grown rapidly over the last five years. MD Paul Hepton conceived Evolution in 2003, when he provided a bespoke installation service for the home cinema market. Technical Director Peter Hudspeth and Head of Sales and Business Development Andy Wyatt joined in 2005 and 2006 respectively; together they extended the Evolution service to cater to the specialist requirements of the systems integration market.

Our process:

- Give us a call – tell us what you're looking for.
- We'll offer you a wide variety of ideas and innovative solutions that meet your needs.
- We'll develop a complete concept solution tailored to your specifications.
- Working alongside the designers, we'll take a hands-on approach from the outset.
- We'll map out the cable schematics and provide architectural drawings for your electricians to work from.

In other words, by the time you move in, it's all done. Every project is stringently monitored by your own project manager ensuring absolute attention to detail.

Common Questions

Inevitably you'll have questions. We'll be on hand to address those questions from day one. In the interim, let's address some of your most common questions up-front

- **Can I retro-fit a home entertainment system?**

While most of our work is undertaken from the initial home design stage, we are equally able to retro-fit solutions to existing homes. We work hard to minimise disruption to your home and your life. Get in touch to discuss your particular requirements...

- **What about the long term viability?**

This is a big issue. Technology changes fast. That's why we supply adaptable future-proof installations. Any required enhancements are easy to implement with minimum fuss.

- **How can I visualise it?**

Once we've arrived at a clear understanding of your requirements, we'll produce a comprehensive set of proposals detailing the commission in detail. From cable schematics to CAD designs and product imagery, you'll be able to see precisely what Evolution will do for you.

- **Can I rely on Evolution to maintain my anonymity?**

Absolutely. We treat each and every client to a thoroughly discrete service. We don't make any exceptions.

- **What are the limits to what we can achieve?**

Your Imagination! Evolution's complete home automation service gives you absolute control over your home environment. From heating, lighting and security to in-house entertainment, you can control it all from a single keypad. We give you the sort of solutions that fit the way you live! Talk to us, together we can explore the possibilities.

"Our service is discrete. We're here to make your lives easier after all. So you can depend on us to exercise the same impeccable levels of service and propriety throughout our dealings with you."

"Even after all of that, we're still here for you. Evolution is committed to ever improving levels of client relationships as well as improving levels of home automation."

Complete Solutions

We refer to complete solutions advisedly. Not just because we provide an exhaustive range of audio, visual, lighting, security and home integration systems, but because we're with you from the start.

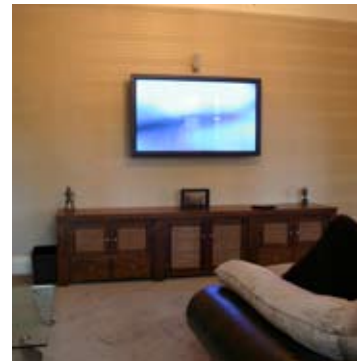

Moreover, we pay just as much attention to the aesthetics as the practicalities. The business of conceiving and creating an integrated system for your home depends in large part on balancing the requirements of form and function. That's ergonomics and art in action.

Integrated solutions make everything beautifully simple. With multi-function controls and discrete screen technology, integrated solutions are uncluttered; minimalist.

Simplicity really is key. Our goal is to go on harnessing the best available technology to make your lives easier and more enjoyable. And the more comprehensive the solutions we provide, the more we're able to do that.

Not everyone needs or wants an all encompassing home automation package. Perhaps you don't want to be able to access BLU-RAY from every room, but you would like to be able to catch the TV news while you're taking your morning shower. Maybe you don't need remote control over blinds, lights and curtains, but you do need two-way communication to your nursery.

Our one-off innovations are just as flexible as our complete solutions. We're still able to customise facilities to match your practical and aesthetic requirements. We're still able to give you the kinds of options that will make a big impact on your day-to-day lives.

“Take a look at the products over the next few pages and imagine the possibilities. Then talk to us. Together we can innovate...”

Products

Video Media Server

The video media server is an easy-to-use library housing CDs, DVDs and digital photos. Every family member can easily access their own server and enjoy their own media. You'll have your entire collection of films, music and memories at your immediate disposal. (And for added security, you can even restrict access to content rated 12 or above.)

iPod Dock

Ultimate convenience for music lovers! Simply dock your iPod in the stylish wall receptacle and enjoy your favourite music through the recessed ceiling speakers. The single dock lets you listen in one room, or around the house.

iPod TV Interface Dock

One single dock – lots of possibilities. Scan through your entire iPod music collection on your TV screen – sit back, make your selection and chill out to tunes all over the house. Great for parties!

Music Server

Our music server doesn't compromise on quality or storage size. With the capacity to store 2000+ CDs at higher CD quality, you can access your entire collection through any TV, controller or keypad. You can even listen to up to six CDs at any one time. That should keep most households happy!

Sky+

You only need one Sky+ box to enjoy the same Sky channel all over the house! But with hundreds of channels to choose from, you might well want to increase your viewing options. No problem. Add a box per room or store multiple boxes centrally to give everyone unrestricted access to Sky.

Sky HD

Are you ready for the ultimate TV experience? With the highest quality 1080i High Definition picture and the biggest selection of channels, Sky HD is the ultimate TV experience. Install a single box and watch the same channel throughout the home; or add multiple boxes for unrestricted viewing.

Blu-Ray

Picture quality doesn't come any better. If you're passionate about movies, you'll want to watch them in their best light. A single, central Blu-Ray player gives you access to superior quality 1080p High Definition DVDs throughout your home. And you can add further players so that family members with wide ranging tastes can all enjoy their own DVDs at the same time.

DVD

With a single, central DVD player, you can access (and control) DVD from throughout the house. Just add further DVD players to be able to watch multiple DVDs.

AMX mio-R4 Remote

On wall speakers

Perfectly suited for solid walls, our on wall speakers are available in different sizes, shapes and colours; all designed to make for an effortless transition into your home.

In ceiling speakers

Fitted directly into plasterboard ceilings or recesses, our discrete speakers sit flush in the ceiling. You'll hardly notice they're there at all. But you'll definitely notice the excellent standard of music reproduction all over the house.

In wall speakers

We fit our speakers into plasterboard walls and recesses so that they're perfectly flush. And perfectly stylish. We offer a wide variety of sizes to suit all requirements; speakers can even be coloured to complement the prevailing room tones!

Floorstanding speakers

Audiophiles will appreciate the improved quality afforded by superior floorstanding speakers. Ours are available in all wood finishes and classic, high gloss black. Styles and size options are wide ranging to fit the requirements of your living space.

Artwork speakers

Transcend expectations. Everyday utilities like stereo speakers can be artistic – beautifully designed and discreetly fitted, but now they can also be art. Our high quality wall speakers are actually disguised as works of art. With a range of classic and contemporary pieces to choose from, you can embellish your listening experience and your aesthetic environment.

Outdoor speakers

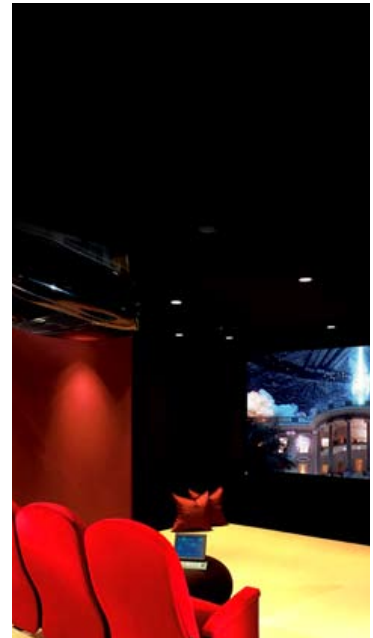

Take the party outside! Our wall mounted, weatherproofed speakers are ideal for patio and decking areas. They provide excellent quality, highly directional sound for all sorts of alfresco occasions.

Outdoor rock speakers.

Rock music? Our outdoor speakers are cunningly disguised as rocks – which can be placed discretely in a rockery or set amongst plants. (Although you might want to show them off to friends and family!) All cabling is installed at initial build (and placed in a protective waterproof bag) for complete safety.

Plasma lifts

You love minimalist living – but you love movies and television too! So your requirements are twofold: you want us to conceal the TV, but still make it easily accessible. Our beautiful, bespoke cabinets are fitted with lifts – so the TV will rise seamlessly out of the cabinet and into position.

Mirror TV

Take a fresh look at technology. To all intents and purposes this is a beautiful mirror – and with hundreds of classic and contemporary frame options to choose from, it's one that will complement your design aesthetic to perfection. But this mirror actually transforms into a stunning 42" plasma television!

Picture lifts

There's an art to concealing a TV. Our picture lift artwork rises automatically to reveal the concealed TV screen – and can be sized and split to fit any requirement. And don't feel constrained by our artwork selection – you can design your very own image to fit.

Swivel mounting

Affording up to 45 degrees of swivel, this is the most versatile TV mount – ideal for corner placement or for shared use between adjacent living spaces. Mounts can be positioned at optimum eye level (or raised to accommodate other features, like speakers or fireplaces).

Fixed mounting

Whatever your requirements: economy of space, minimalist style, or ease of viewing, our fixed mounting systems are ideal. Holding the TV directly to the wall (at optimum eye level), or higher (e.g. to accommodate a fireplace) it's a stylish, secure solution for your requirements.

Waterproof TV

You can get up to date with the headlines while you shower, or luxuriate with a movie in the bath tub thanks to our incredible waterproof TV. There are a variety of styles and fitting options available. Oh, and because the screen is heated – you'll never even have to worry about it steaming up!

“Our products are wide ranging, but there's much more to giving you an evolved level of service than giving you an evolved product range. Evolution has the capacity, the skills and the imaginative thinking to develop client-centric solutions.”

AMX 8400i touchpanel

AMX cv-7 touchpanel

“Evolution is at the cutting edge of innovation. We're not tied in to any one manufacturer, so we give you an extensive range of products and solutions to fit your needs. Our team of designers and home automation specialists works with you to select the options that meet both your immediate requirements and your long term expectations.”

All your digital music. All over your house.SM

Sonos is the first wireless, multi-room digital music system that lets you play all your favourite music all over your house—and control it all from the palm of your hand. With a wireless Sonos® Controller in hand, you can find and play millions of songs—from select online music and radio services, your personal digital music collection, or all of the above.

And, with Sonos ZonePlayers™ in the rooms of your choice, you can play the same song in different rooms, or different songs in different rooms. To start listening, just grab the full-color Controller and simply pick a room, pick a song and hit play.

Wireless, handheld control.

With the Sonos Controller you can instantly access your entire music collection, plus select online music and radio services, from the comfort of your living room couch or dining room chair. No more running to your PC to turn on, change or turn off your music. No need for pointing or line of sight. Use one Controller for your entire house or several for added convenience.

“The Sonos BU150 Digital Music System actually offers more flexibility and ease of use than many multiroom audio systems that cost thousands more.”

Wireless, multi-room music.

With Sonos you can wirelessly stream any song to any room—from the bedroom to the backyard. Just connect ZP90s to your home theater, stereo or any other amplified audio device and put ZP120s and speakers everywhere else you want music. Now you'll have a multi-room digital music system that delivers superior audio all through the house—in up to 32 rooms.

Not digitised your music collection yet?

When you do, you'll be amazed at how your music collection is revitalised by using your Sonos™ System. Browsing your collection and selecting your music has never been so quick and easy. Regain your shelf space and save time in searching for your favourite CD. It's all in the palm of your hand. Don't own any digital music or just want more of it? Not to worry. Sonos makes it simple to get millions of songs all over your house from a wide selection of music services such as Napster, allowing you to listen to whatever you want, whenever, and wherever you want it.

Play any song. In any room. From anywhere.

Evolution, Harrogate's premiere custom installation specialists, can offer 2 rooms of separate hi-fi audio, including full installation and discrete, in-ceiling speakers, starting from £2395 including VAT. Please call us on 08452 603066 for details.

It's your home, your choices and your style.

Completely customisable, the graphical user interface is made to match your personal taste and preferences. The Pronto TSU9400 is activity-based rather than equipment-based. This means that with one touch of a button you select what you want to do: watch a DVD, listen to music, adjust the lighting... There is no need to figure out equipment configurations. Nor will you get lost in a complex menu.

The Pronto TSU9400 is all about total home control. Besides control of your audio video equipment, the Pronto TSU9400 can also control audio video servers, lighting, heating, ventilation, air conditioning, and music files stored on your PC! Even better, you can receive system feedback on the control panel screen telling you whether the lights are on or off, the temperature is set right, or even what the weather is going to be like.

With full multi-room operation, you are in control of your home entertainment both in and around the house. It controls hidden equipment (in cupboards) and equipment in other rooms. A long battery life per recharge ensures reliable operation, while exclusive system feedback information guarantees problem-free system use for many years.

"The pronto is without a doubt the ultimate control device for it's price, it is simply unsurpassable for ease of use, elegance and durability. It has been a long time since we have seen this level of product for this budget"

Home control from £999

Evolution, Harrogate's premiere custom installation specialists can offer whole home control from the Philips pronto, including audio, video, temperature, curtain control, and automation, from £999 inclusive of VAT, for details; please call us on 08452 603066
